CERTIFICATE OF LISTING

IAPMO Research and Testing, Inc. is a product certification body which tests and inspects samples taken from the supplier's stock or from the market or a combination of both to verify compliance to the requirements of applicable codes and standards. This activity is coupled with periodic surveillance of the supplier's factory and warehouses as well as the assessment of the supplier's Quality Assurance System. This listing is subject to the conditions set forth in the characteristics below and is not to be construed as any recommendation, assurance or guarantee by IAPMO Research and Testing, Inc. of the product acceptance by Authorities Having Jurisdiction.

This certificate is not evidence of current listing. To verify listing status, visit the IAPMO R&T Product Listing Directory at pld.iapmo.org

Identification:

Diverting roof vent terminals shall be permanently marked with the manufacturer's name or trademark. Marking shall be permanent, legible and visible after installation. The product shall bear the C/IAPMO® triangular certification mark.

Characteristics:

Diverting roof vents are intended for installation under solar panels to divert outlet termination points of roof vent pipes or stacks in residential and commercial buildings' DWV systems. Sizes covered are NPS 1-1/2 and NPS 2.

The diverting roof vent terminal also helps to protect the roof vent pipe when a solar panel is to be placed over the vent, and provides equivalent performance to a vent terminating at least 6 inches above the roof.

To be installed in accordance with the manufacturer's instructions. Instructions should specify the piping materials with which the diverting vent terminals are designed to connect to.

Products listed on this certificate have been tested by an IAPMO R&T recognized laboratory. This recognition has been granted based upon the laboratory's compliance to the applicable requirements of ISO/IEC 17025.
